Papiaments (Native)

Experience

Freelance Web Developer

Jan 2026 - Present

As a freelance web developer, I develop and maintain websites and web applications for clients. I work on both the technical and visual side of projects, including frontend development, backend functionality, databases, responsive design and integrations. I communicate directly with clients to translate their requirements into practical digital solutions and manage projects from development to delivery.

Junior Software Developer

July 2025 - July 2026

Internship Software Developer Explico, Eindhoven

Feb 2025 - July 2025

Worked as a Software Developer within a small development team, contributing to the development and improvement of web-based applications. I worked on both frontend and backend development and was also involved in UI/UX design using Figma. I collaborated with team members to translate requirements into functional solutions, develop new features and improve existing applications.

Internship Software Developer The Challenge Zone, Geleen

Sep 2024 - Feb 2025

During my internship, I worked on developing a CMS system for a company that creates websites for other businesses. I was responsible for developing and improving parts of the system using JavaScript, CSS and SCSS. Alongside development, I worked on my professional development goals, tested software and functionality, and gained practical experience with the software development process.
